

## Leverage opportunities checklist

### **To overcome or avoid the barrier:**

- **What type of resource is needed (financial, natural, cultural)?** Where can this be found?
- **Who/ which org. would be responsible?** How could they be influenced? Who else?
- **What type of external 'event' would overcome the barrier?** How could we be prepared if this event happened?
- **Where else does the barrier exist?** What lessons (or alliances) can be drawn?
- **What does the barrier rely on to exist?** How could you undermine or reduce this support?

**In stage 6:** Starting with the 'nearest' barriers in time, discuss and propose how these might be avoided or overcome. Use the questions above as a prompt. Write suggestions on the 'lime' sticky-notes and place them below the barrier in focus
